

## Apprenticeship Vacancies

### **Paint Technician, Panel Technician, MET Technician, Vehicle Damage Assessor and Parts Advisor**

[Maldon Accident repair centre Apprenticeships](#)

We are recruiting for multiple apprentices for a new state of the art vehicle repair facility.

**Paint Technician** - A Vehicle Damage Paint Technician works in the vehicle body repair sector of the motor industry. The role is to prepare, spray and finish vehicles that have been involved in collisions and other incidents, in an efficient manner. This includes ensuring correct colour match and final finish to the company and customer's exacting standards. They are responsible for the finishing of whole panels, panel sections, wheels, or even a car's entire bodywork.

**Panel Technician** - A Vehicle Damage Panel Technician works within the collision repair workshop, demonstrating expert working knowledge in relation to the removal, repair and replacement of vehicle body panels to vehicle manufacturer specification. Technicians will use their skills to correctly identify the different body panel types and have the ability to use the correct repair tools to carry out the work to the highest possible standard.

**MET Technician** - A Vehicle Damage MET Technician works in the vehicle body repair sector of the motor industry. The role is to identify damaged mechanical and electrical components on a damaged car/light commercial vehicle and remove and refit these components before and after body repair work has been carried out. A MET Technician will also ensure everything is in full and safe working order once the repair is complete.

**Vehicle Damage Assessor** - A Vehicle Damage Assessor role is to methodically and accurately inspect and assess all elements of a motor vehicle that has sustained damage and requires repair and produce an accurate estimate to carry out the repair which is subsequently agreed by key stakeholders. A VDA interacts with customers, the Bodyshop manager, vehicle repair technicians, office/administrative staff and insurance companies. The assessor must be able to assess the vehicle but also liaise with the customer, insurance company and vehicle technicians to discuss the assessment, damage to the vehicle and how it will be repaired.

**Parts Advisor** - A Parts Advisor is a key member of the team is responsible for the smooth running of the parts department, supporting the efficient effective supply of parts to the workshop.
